Outlook

Outlook

FY 2025 outlook and Q1 2025 trading update

Group revenue

We expect YoY Group revenue to grow in the high-teens to low-twenties range, and will surpass market volume growth in all our geographies.

InPost to grow market share in all markets.

InPost volume growth of mid-teens for the Group coming from a mix of:

- i) high single-digit to low double-digit volume growth in Poland driven by visible softening of the market, but still ahead of the market,
- ii) mid-to-high single-digit volume growth in Mondial Relay markets,
- iii) UK volumes growth mid-40s YoY, roughly in line with APM network expansion.

Poland and Mondial Relay revenue to grow slightly above volume due to mix effect and repricing.

UK revenue, including Menzies consolidation to almost double YoY.

EBITDA growth

We expect an Adjusted EBITDA increase in the low to mid-twenties.

Group Adjusted EBITDA margin to be slightly higher YoY on the back of stabilizing Poland profitability at mid-40s and improving profitability in international markets.

Network

We plan to accelerate deployment to over 14,000 APMs across all markets.

This includes ~3,000 APMs in Poland, ~4,000 APMs in Benefralux, ~4,500 APMs in the UK, ~2,000 in Iberia, ~1,000 in Italy.

CAPEX and FCF

CAPEX of PLN c. 1.8 billion, with c. 60% allocated for APM production and deployment.

We expect **positive FCF at the Group level**.

We expect to further deleverage from 2024 levels (excl. M&As).

Q1 2025 trading update

For Q1 2025, in Poland we anticipate c. 10% volume growth, thereby clearly outperforming a softer e-commerce market, and delivering year-on-year growth across all segments regardless of the very high baseline established in Q1 2024. In International we also continue to outgrow the market, expecting c. 17% InPost volume growth YoY.

Outlook

2025 action plan

Poland

Definitions and numerical reconciliations of Alternative Performance Measures

Adjusted EBITDA facilitates the comparison of the Group's operating results from period to period and between segments by removing the impact of, among other things, its capital structure, asset base and tax consequences and one-off and non-cash costs not related to its day-to-day operations. Adjusted EBITDA is defined as net profit/(loss) for the period, adjusted for profit/(loss) from discontinued operations, income tax expense/(benefit), profit on sales of an organised part of an enterprise, share of result of equity-accounted investees, gain/(loss) on revaluation of previously owned shares in acquired entities, finance costs and income, depreciation and amortisation, adjusted with non-cash (share-based payments), and one-off costs (mainly Restructuring and Acquisition costs). Restructuring costs refer to the legal and advisory costs of the standardisation of operating, administration, and business processes of acquired companies to align them with Group standards. Acquisition costs refer to the legal and advisory costs connected with potential and actual acquisition projects.

Adjusted EBITDA Margin is defined as Adjusted EBITDA divided by the total of Revenue and Other operating income.

Capex is defined as the total of Purchase of property, plant and equipment and Purchase of intangible assets presented in Cash Flow Statement. This measure is used to assess the total amount of cash outflows invested in the Group's non-current assets.

Operating EBITDA facilitates the comparisons of the Group's operating results from period to period and between segments by removing the impact of, among other things, its capital structure, asset base and tax consequences. Operating EBITDA is defined as net profit for the period adjusted for profit (loss) from discontinued operations, income tax expense (benefit), profit on sales of an organised part of an enterprise, share of profits of equity-accounted investees, finance costs and income as well as depreciation and amortisation.

Operating EBITDA Margin is defined as Operating EBITDA divided by the total of Revenue and Other operating income.
