

Exceptional offer for Amazon.pl customers

InPost Group, a leading delivery platform for e-commerce in Europe, is extending the cut-off times for orders placed on Amazon.pl. Now, orders placed as late as 6:30 PM will be delivered to buyers the very next day!

"InPost Group is a pioneer in modern D+1 deliveries, and the quality of our services in Poland sets a benchmark for the entire industry and serves as a model we are consistently implementing across the eight European markets where we operate. From today, thanks to the continuous development of our innovative operational solutions, Amazon.pl customers can place orders until 6:30 PM — with the guarantee that their package will arrive the next day. This significantly enhances the shopping experience for consumers. We continue to invest in expanding infrastructure, automating processes, and developing modern technologies that support our partners," **commented Dagmara Brzezińska, Vice President of Sales at InPost.**

"Speed and convenience of delivery are very important to Amazon.pl customers. In Poland, we are seeing a growing popularity of the Amazon Prime programme, which offers free and fast delivery of millions of products from our store, with no minimum order amount, delivered to the home, a Paczkomat® APM, or a PUDO point. Whether customers are waiting for a gift for a loved one, essential household items, electronics, pet food, or their favourite book — we always strive to deliver packages as quickly as possible. That's why we're pleased that our customers will now be able to receive their orders delivered by InPost even faster," **said Katarzyna Ciechanowska-Ciosk, Country Leader of Amazon.pl.**

In 2024, InPost Group delivered over 1.1 billion parcels, marking strong growth of 22% compared to 2023. To meet the increasing demand for cutting-edge logistics services, last year InPost Group opened the largest sorting facility in Poland, which can handle up to 85,000 parcels per hour. In just five months, the newly opened facility in Wola Bykowska processed over 100 million parcels!

InPost is currently the second-largest operator in Poland in terms of warehouse and logistics space. The center features four courier bays dedicated to 120 couriers. The building holds a BREEAM EXCELLENT certificate, includes a photovoltaic installation with a capacity of 200 kWh (expandable to 1 MW), as well as facilities for charging bicycles, AI-powered CCTV, car chargers, hybrid heating, heat pumps, and radiant heaters.

About InPost

InPost (AEX: INPST) is a leading logistics solutions provider for the e-commerce sector in Europe. Founded by Rafat Brzoska, InPost is now a top delivery platform for e-commerce that has revolutionized the parcel market in Poland. The first Paczkomat® parcel lockers appeared in Kraków in 2009 and quickly became an essential part of online shopping, offering speed and convenience.

By the end of 2024, InPost Group operated over 82,000 out-of-home delivery points, including nearly 47,000 modern Paczkomat® APMs and more than 35,000 PUDO points (Pick-Up/Drop-Off) across 9 countries: the United Kingdom, France, Poland, Italy, Spain, Portugal, Belgium, Luxembourg, and the Netherlands. InPost also provides courier and fulfillment services for e-commerce sellers, collaborating with around 100,000 online retailers. In 2024 the company handled over one billion parcels.

For years, environmental sustainability has been one of InPost's top priorities. The InPost Group's Decarbonization Strategy is a core component of its overall business strategy. InPost has joined the SBTi (Science Based Targets initiative) and is one of the first companies in Poland aiming to achieve NET-ZERO emissions by 2040.

About Amazon

Amazon has been operating in Poland since 2014. Between 2012 and 2023, the company invested over PLN 30 billion in the country, establishing 11 logistics centers, corporate offices, Amazon Web Services (AWS), Amazon Development Centers, and the Amazon.pl online store. The company's growth has helped create approximately 70,000 direct and indirect jobs and has contributed over PLN 31 billion to Poland's GDP.

Since March 2021, when Amazon.pl was launched, the company has focused on offering customers a wider selection of products at great prices with fast and convenient delivery.

Amazon Prime customers have access to the best of Amazon in shopping and entertainment, including unlimited, fast, and free deliveries of millions of products from Amazon.pl with no minimum order amount, a large catalog of award-winning films and series on Prime Video, free games via Prime Gaming, and exclusive shopping events.

At the heart of all Amazon's investments are the same goals: to be the most customer-centric company, the best employer, and the safest place to work in the world. None of this would be possible without the pioneering technologies and artificial intelligence that Amazon has been developing since its inception globally and in Poland.
